

FARAZ POOMUN

Full-Stack Sr. Software Developer

20 Maurice Poupard ST,
Plaine-Verte
Port-Louis

ABOUT ME

While I'm a proficient full-stack developer able to work on front-end and testing code, my expertise lies in building scalable back-end services in .Net with the best practices and performance always in mind.

Being challenged and working on something that really gets me out of my comfort zone is all that I'm about. Furthermore, continuously learning new development techniques and practices that are or will be important to me and the success of the organization is mandatory to me.
